

“The new RFID passes are cool, they work from like a metre away without too much precision on the part of the scanners so no more fluffing around getting your pass out or waiting for the ticket checker to clamber across everyone’s planks to scan you, they can do it all from the side of the lines.”

## FROM CLUNKY TO COOL

Working closely with Ruapehu Alpine Lifts, Mobicco designed and manufactured UHF RFID ski passes, supplied and integrated Motorola handheld computers with RFID readers, Zebra card printers and RFID encoders.
